Art Unit: 3753

1. The disclosure is objected to because of the following informalities: In paragraph 0001, line 2, "PCT/AU/01336" should be --PCT/AU02/01336--.

Appropriate correction is required.

2. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Australia on 02 October 2001. It is noted, however, that applicant has not filed a certified copy of the Australian application as required by 35 U.S.C. 119(b).
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7, 9, and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sinker et al.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sinker et al in view of Buckner et al. This claim is considered met by Sinker et al except that the flexible seal 13 of Sinker et al is not fixed to the outer body. It would have been obvious in view of seal 62 of Buckner et al to fix the seal to the outer body rather than to the shuttle since such a seal would function equivalently.

Art Unit: 3753

7. Claims 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sinker et al. These claims are considered met by Sinker et al except that the flexible seal 13 of Sinker et al is not a bucket seal. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to substitute a bucket seal for the O-ring seal 13 of Sinker because applicant asserts no criticality in the particular type of seal.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 3 and 12 are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation of "passageway the shuttle" in claim 3, lines 3-4 is non-idiomatic. Claim 12 is identical to claim 11, from which it depends.
